21 or high intensity reflectorized tape mounted as near as
22 practicable to the center of the mass and at an approximate height
23 of not less than two (2) nor more than six (6) feet from level
24 ground or pavement surface. In any event, the emblem or tape
25 shall be mounted so as to be entirely visible from the rear, day
26 or night; and * * * the emblem or tape and its position of
27 mounting on the vehicle shall meet the specifications established
28 by rules and regulations properly adopted and promulgated by the

46 and regulations establishing standards and specifications for the
47 design, materials and mounting of a standard slow-moving-vehicle
48 emblem and high intensity reflectorized tape for the uniform
49 identification of slow-moving vehicles. In adopting said rules
50 and regulations the Commissioner of Public Safety shall consider
51 the standard markings used in other states, the current
52 recommendations of the American Society of Agricultural Engineers
53 and the Society of Automotive Engineers, in order that the

57 amended as follows:

58 63-7-99. Compliance with Section 63-7-91 shall not create a
