159 contracting for new capital construction projects to be used as a
160 pilot program for the following projects:

162 Authority pursuant to agreements between both governmental

171 (i) "Design-build method of contracting" means a
172 contract that combines the design and construction phases of a
173 project into a single contract and the contractor is required to
174 satisfactorily perform, at a minimum, both the design and
175 construction of the project.

176 (ii) "Design-build bridging method of contracting"
177 means a contract that requires design through the design
178 development phase by a professional designer, after which a
179 request for qualifications for design completion and construction
180 is required for the completion of the project from a single
181 contractor that combines the balance of design and construction
182 phases of a project into a single contract. The contractor is
183 required to satisfactorily perform, at a minimum, both the balance
184 of design and construction of the project.

185 (c) The department shall establish detailed criteria
186 for the selection of the successful design-build/design-build
187 bridging contractor in each request for design-build/design-build
188 bridging proposals. The request for qualifications evaluation of
189 the selection committee is a public record and shall be maintained
190 for a minimum of three (3) years after project completion.

191 (d) The department shall maintain detailed records on
192 projects separate and apart from its regular record keeping. The
193 department shall file a report to the Legislature evaluating the
194 design-build/design-build bridging method of contracting by
195 comparing it to the low-bid method of contracting. At a minimum,
196 the report must include:

197 (i) The management goals and objectives for the
198 design-build/design-build bridging system of management;

199 (ii) A complete description of the components of
200 the design-build/design-build bridging management system,
201 including a description of the system the department put into
202 place on all projects managed under the system to insure that it
203 has the complete information on building segment costs and to
204 insure proper analysis of any proposal the department receives
205 from a contractor;

206 (iii) The accountability systems the department
207 established to monitor any design-build/design-build bridging
208 project's compliance with specific goals and objectives for the
209 project;

210 (iv) The outcome of any project or any interim
211 report on an ongoing project let under a design-build/design-build
212 bridging management system showing compliance with the goals,
213 objectives, policies and procedures the department set for the
214 project; and

215 (v) The method used by the department to select
216 projects to be let under the design-build/design-build bridging
217 system of management and all other systems, policies and
218 procedures that the department considered as necessary components
219 to a design-build/design-build bridging management system.

220 (e) All contracts let under the provisions of this
221 subsection shall be subject to oversight and review by the State
222 Auditor.

223 **SECTION 2.** This act shall take effect and be in force from
224 and after its passage.
