332 development phase by a professional designer, after which a
333 request for qualifications for design completion and construction
334 is required for the completion of the project from a single
335 contractor that combines the balance of design and construction
336 phases of a project into a single contract. The contractor is
337 required to satisfactorily perform, at a minimum, both the balance
338 of design and construction of the project.

339 (c) The department shall establish detailed criteria
340 for the selection of the successful design-build/design-build
341 bridging contractor in each request for design-build/design-build
342 bridging proposals. The request for qualifications evaluation of
343 the selection committee is a public record and shall be maintained
344 for a minimum of three (3) years after project completion.

345 (d) The department shall maintain detailed records on
346 projects separate and apart from its regular record keeping. The
347 department shall file a report to the Legislature evaluating the
348 design-build/design-build bridging method of contracting by
349 comparing it to the low-bid method of contracting. At a minimum,
350 the report must include:

351 (i) The management goals and objectives for the
352 design-build/design-build bridging system of management;

353 (ii) A complete description of the components of
354 the design-build/design-build bridging management system,
355 including a description of the system the department put into
356 place on all projects managed under the system to insure that it
357 has the complete information on building segment costs and to
358 insure proper analysis of any proposal the department receives
359 from a contractor;

360 (iii) The accountability systems the department
361 established to monitor any design-build/design-build bridging
362 project's compliance with specific goals and objectives for the
363 project;

364 (iv) The outcome of any project or any interim
365 report on an ongoing project let under a design-build/design-build
366 bridging management system showing compliance with the goals,
367 objectives, policies and procedures the department set for the
368 project; and

369 (v) The method used by the department to select
370 projects to be let under the design-build/design-build bridging
371 system of management and all other systems, policies and
372 procedures that the department considered as necessary components
373 to a design-build/design-build bridging management system.

374 (e) All contracts let under the provisions of this
375 subsection shall be subject to oversight and review by the State
376 Auditor.

377 **SECTION 4.** This act shall take effect and be in force from
378 and after July 1, 2006.
