222 of design and construction of the project.

228 for a minimum of three (3) years after project completion.

229 (d) The department shall maintain detailed records on
230 projects separate and apart from its regular record keeping. The
231 department shall file a report to the Legislature evaluating the

234 the report must include:

238 the design-build/design-build bridging management system,
239 including a description of the system the department put into
240 place on all projects managed under the system to insure that it
241 has the complete information on building segment costs and to
242 insure proper analysis of any proposal the department receives
243 from a contractor;

244 (iii) The accountability systems the department
245 established to monitor any design-build/design-build bridging
246 project's compliance with specific goals and objectives for the
247 project;

248 (iv) The outcome of any project or any interim
249 report on an ongoing project let under a design-build/design-build
250 bridging management system showing compliance with the goals,
251 objectives, policies and procedures the department set for the
252 project; and

253 (v) The method used by the department to select
254 projects to be let under the design-build/design-build bridging
255 system of management and all other systems, policies and
256 procedures that the department considered as necessary components
257 to a design-build/design-build bridging management system.

258 (e) All contracts let under the provisions of this
259 subsection shall be subject to oversight and review by the State
260 Auditor.

261 (8) The department shall adopt and enforce building code
262 standards for the new construction of public facilities in a
263 manner consistent with the provisions of Section 31-11-33.
